

THE DEEP

1. What is the largest habitat on earth?	
2. At 1000 m under water, a sperm whale's lungs shrink to what percent of their original volume?	
3. Certain deep sea animals were the inspiration for what movie series?	
4. How long can a jelly(fish) grow?	
5. Why do hatchet fish have light producing cells on their bellies?	
6. What animal has the largest teeth compared to its body size?	
7. What is Bioluminescence?	
8. How big are male anglers compared to females?	
9. What colour is most common for bioluminescence?	
10. What type of animal are Japanese fisherman shown pulling out of the water with nets?	
11. The sun triggers the largest migration of living organisms on our planet. How many million tonnes of animals travel up from the dark zone into shallow water each night?	
12. What is the deepest that plants can grow under water?	
13. How do some sea urchins ensure that they are never very far from a mate?	
14. For how many years have six-gilled sharks remained unchanged?	
15. What animals are shown feeding in the head of a whale and can tie themselves into knots to get a better grip on flesh?	
16. How deep can Alvin dive below the ocean's surface?	
17. What are the largest geological structures on our planet?	
18. What do tubeworms have inside of them that allow them to use sulfides as a source of energy?	
19. What was discovered in 1990, over half a mile below the Gulf of Mexico?.	
20. So far, we have explored only what percent of the deep ocean floor.
